

The Academy of Veterinary Clinical Pathology Technicians

Knowledge List Instructions

Candidates should know, understand, recognize and utilize the information contained in the AVCPT Knowledge Topic List. This list should be used as an aid in preparation for sitting for the AVCPT examination. The topics listed are in addition to the AVCPT Skills List, and although some overlap will occur, any topic that appears on either list is suitable information for examination. However, unlike the skills list, you are not required to provide proof of skill mastery for the knowledge list. The examination will provide evidence of this information. It is strongly suggested that candidates utilize the AVCPT Recommended Reading List for review of the AVCPT Knowledge Topic List items.
